

Prospects and limitations of dairying in Gujranwala district, Punjab

By Muhammad Arif

LAP Lambert Academic Publishing Dez 2011, 2011. Taschenbuch. Book Condition: Neu. 220x150x6 mm. This item is printed on demand - Print on Demand Neuware - Globally, Pakistan is the 4th largest milk producing country contributing about Rs.540 billion per annum to the national economy. Buffaloes (30.8 million) and cattle (34.3 million) are the principal dairy animals contributing about 65 and 30% respectively towards national milk supply. More than 70 % dairy animals are owned by farmers having herd size of 1-10 animals. They produce more than 80% of market milk supply. The demand for livestock products is likely to increase due to increasing human population growth, urbanization and increase in the per capita income in country. Animals productivity is far below than their actual genetic potential chiefly due to poor husbandry of dairy animals, limited health coverage, limited small farmers access to credit facilities etc. Rural communities in general and small farmers particularly suffer the most, getting low return from their farms produce. Moreover, escalating inflation in the country has further exaggerated the situation, therefore the present project was planned focusing small farmers. 108 pp. Englisch.

Reviews

It is easy in read through easier to fully grasp. it had been writtern very completely and useful. I am pleased to let you know that here is the greatest book we have read during my personal life and could be he very best book for possibly.

-- Miss Marge Jerde

It is really an remarkable publication i actually have possibly study. It usually is not going to cost excessive. Its been written in an exceedingly basic way and is particularly only right after i finished reading this publication through which basically transformed me, affect the way i think.

-- Dr. Breana O'Kon
