Fires in Lake Superior Iron Mines (Classic Reprint)

By Edwin Higgins

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Fires in Lake Superior Iron Mines Few mines are free from all danger of fire. The danger to life and property may be reduced, but rarely eliminated, by fireproof construction in and about the shaft, as timber and other combustible material are requisite for the development of nearly all mines. In fact, in deep mines, such as some in the Lake Superior region, where the roof pressure is very great, it is not always possible to use rigid fireproof construction because of the gradual but irresistible movement of the rocks. Wherever fireproof construction is not possible in and about shafts, underground landings, and stables, other precautions, such as a good water-supply system consisting of pipe lines and hydrants, abundant hose, automatic sprinklers, and the organization of fire-fighting crews, are essential. Also treatment of the timber by zinc silicate or common salt solutions not only preserves the timber but makes it much less inflammable. Careful watch should be kept of such sources of ignition as the careless use of candles or other open lights or of...
