Createspace, United States, 2011. Paperback. Book Condition: New. 276 x 214 mm. Language: English . Brand New Book ***** Print on Demand *****.This book addresses the curiosity of computer-literate youngsters from grades 6 through 12 who want to learn how to write their own computer programs. Although programming is serious, it can also be a lot of fun - and this book turns the process into an enjoyable challenge rather than a boring task. For children: You may already know a lot about computers, and probably spend a lot of time using them. However, if you are curious about what s inside the computer, if you want to understand what makes it work, and how you can make it do what YOU want - which is what programming is all about - then this is the book for you. For Parents and Educators: Most children today practically live with computers, and they cannot even imagine a world without them. However, rarely are they given the opportunity to understand how computers actually work, let alone what programming a computer really means. There are no other books that satisfy the child s curiosity at a level that an average child can understand and enjoy. This book was created to fulfill that goal. Note: All the examples in the book can be downloaded from the book s website,
